REVERBERO

## Introduction to the Collection

With Organic Waves Reverbero has created a large collection of table lamps made with ceramic lamp and fabric lampshade.

This is to offer its customers the opportunity to balance and harmonize modern furniture proposals:

the return to matter produces the expression of the human footprint through the combination of design, innovation, craftsmanship and materials.

In this case, Italian craftsmanship acts as a catalyst, going back to materially expose the creative act.

The interior design market, in recent decades, has undergone a strong evolution towards linear forms of great sobriety and minimalism.

The lighting sector was no exception, proposing a physical resizing of the lighting body to become a beam of light that furnishes, indirectly, highlighting the architectural lines. In this context, Reverbero has set itself a challenge: to innovate and revisit traditional materials, especially those of natural origin.

A small nuance, a shade of color, helps us to free ourselves from the mechanics to have full expressive capacity. The small differences that can be revealed between one artifact and another are the confirmation of the energy with which the material was molded.

With Reverbero lamps, perfection is not represented by the systematic repetition of the same specimen, but by the sharing of knowledge that can be passed through the hands to offer a synthesis that aspires to beauty.

For this collection we have explored new ways of giving life to handcrafted products.

Reverbero has infused traditional processes with the possibility of generating something new, but recognizable, identifying and common at the same time.

Infusing the right spirit to a project is fundamental in the process that leads us to the goal and nourishes the desire to establish a creative and experimental dialogue that embraces materials and forms, ancestral and modern.

The collection includes a series of decorative lamps born from the fusion of skills that aim to enhance artisan techniques.

The basic philosophy translates into compositions studied with elegance: from the choice of materials to the attention to detail, the effect is that of a new object, able to give us moments of relaxation and make us feel pampered even in the living room, always surrounded by a feeling of returning to nature.

Man has always used available technology to create tools and utensils, and some of these were used in rituals. Our mission is to create objects that can help us create the right atmosphere, surround us with beauty, create a ritual, (for example while reading a book or sharing our day with the people we love) or simply to enrich the environment in which we live, making it personal.

Each lamp, after a careful quality control, is accompanied by a Certificate of Authenticity and a 100% Made in Italy Guarantee.

*Reverbero*

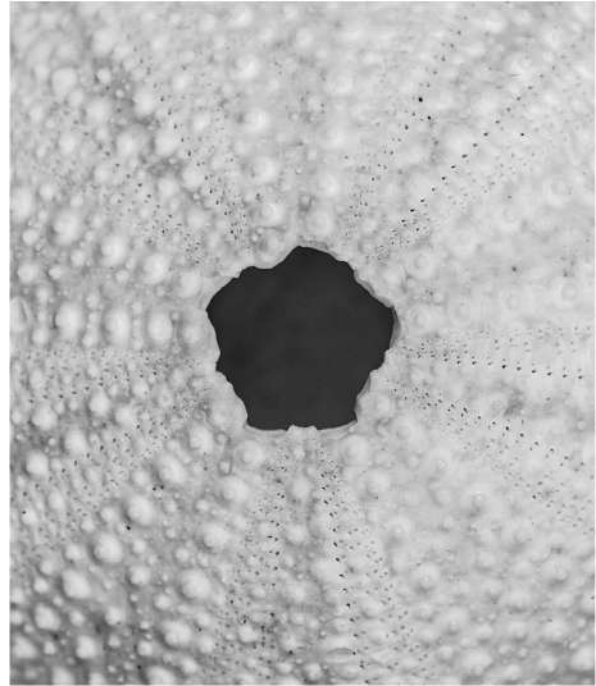

Ours is an ambitious challenge: to use ancient materials to arrive at original creations.

If we don't stop wondering, we discover how much we still have to explore. This, in our opinion, is the real innovation.

The Organic Waves project stems from a question: is it possible to still be fascinated by the shapes that nature offers us and, inspired by them, to be able to infuse a product with that beauty that manages to enchant us every time?

The name of the collection explains what the source of inspiration is: the archetypal forms, the reflections of a sunset, the geometric repetitions recurring in nature; they are a source of emotions and leave room for the contemplation of beauty.

The use of traditional materials such as ceramics and fabrics, which have accompanied the journey of our species on earth, have been shaped thanks to the identity capacity of Italian design, involving young product designers.

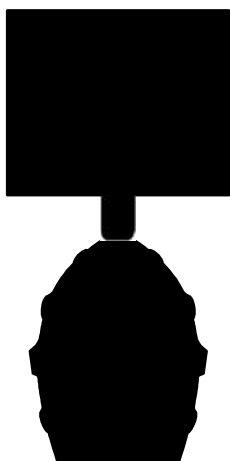

Light has always played a key role in living spaces. The challenge of giving a furnishing role to lighting bodies is a creative space loved by designers.

In this case, light and form played a fundamental role in the design phase of the collection. Light is intangible and invisible, but it makes visible what has already been revealed in form. The shape was inspired by the incessant combinations of nature, the same ones that leave children amazed at every discovery.

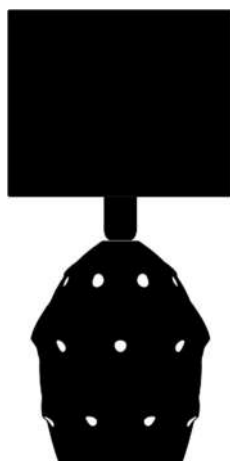

This continuous dance between light and form that inspired the project can be found in our products, like a photograph that is able to portray the creation process.

In this sense we wanted to look at the world with the eyes of children, to amaze us, to get involved and play with what the waves on the shore bring before our eyes. We then played to break down and recompose, letting ourselves be inspired by the passion for nature.

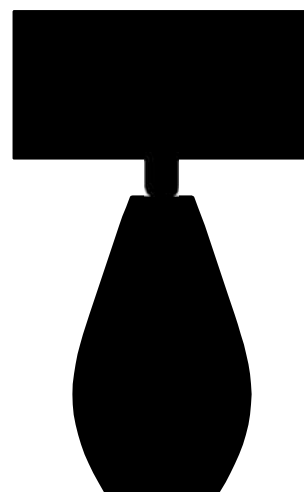

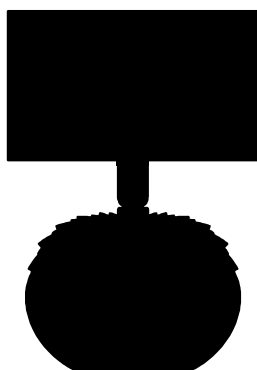

**ACCENTO**  
The free creativity of Gea

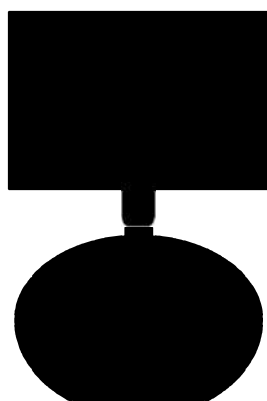

**RESPIRO**  
Instinctual madness  
of form

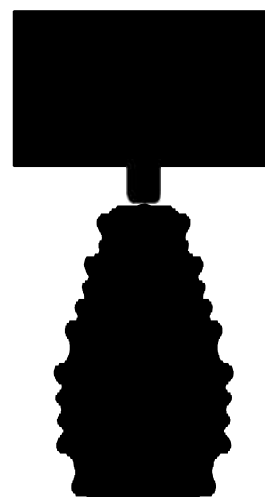

**ACQUA**  
Elegance and exclusivity

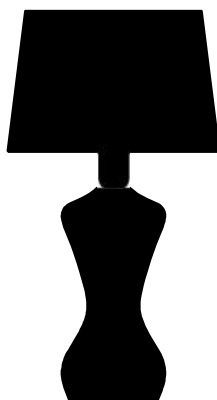

**DALIDA**  
Floral impromptness

**ARABESQUE**  
Poetics of organic geometry

**MOVIMENTO**  
Geometry that creates movement

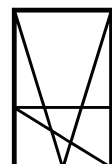

**SONATA** Sinuous and  
expressive sensuality

**ACCENTO**

Form and image, harmony and representation. Accento is a dance of decomposition and recomposition reminiscent of Cubist sculpture.

LAMP – available colors \*

 Green (Glossy COD. LD1FL06)

 Cream (Matte COD. LD1FL07)

LAMP SHADE - available colors \*

 Green (Cylindrical COD. P66251FP07)

 Cream (Cylindrical COD. P66251FP02)

\* We invite you to consult our website to view the photos of the colors

Lamp measures _____	o 30 - h 35 cm
Lampshade measures _____	o 30 - h 25 cm
Total weight _____	2.3 Kg
Main materials _____	Ceramic, fabric, steel
Lamp colors _____	Green, Cream
Lampshade colors _____	Green, Cream
Power cord _____	PVC
Lamp holder _____	E27
Max Watt _____	60W 230V/50Hz
Recommended bulb _____	LED 7 - 11W 4000 °K
Insulation class _____	CL I
Compliance _____	CE - 2014/35/UE - 2011/65/UE
IP grade _____	IP20

## How to order a product

To order one or more Reverbero products,  
request more information or clarifications,  
please write an e-mail to:  
[ordini@reverbero.it](mailto:ordini@reverbero.it)

To place an order it will be sufficient:

- . choose the lamp - lampshade combinations;
- . indicate in the body of the e-mail the codes shown in the "Product details" tab on the back of each product presented here;
- . indicate the quantity.

We will be glad to answer all your requests.
